

METRO -TAXI

About Taxi Cabs :-

Taxi cabs are often an important supplement for people who car pool or use public transportation and are popular form of transport in any compact city, throughout the world. The taxi market in Indore is predominantly three wheeler auto based. A certain segment is covered by unorganized and illegal private taxi operators who excessively charge the commuters. This has failed to identify and tap the niche market. The lack of well organized taxi services in the city has also resulted into increase in number of cars and congestion on roads. A well organized taxi service may serve as quick and easy means of transportation across the city and will also help reduce congestion which is the result of ever growing number of motor vehicles with no parking facilities and on street parking.

ICTSL now wishes to start the City Taxi transport service under its existing institutional setup in the lines of City Bus Services. It would be a kind of demand responsive on-call Taxi services that will use our state of art, GPS system to ensure seamless operations
